

1) When there is a text, there should be a “->” Button on the far right side of this textfield

A horizontal text input field with rounded corners and a light gray border. On the left side, there is a small blue icon of two interlocking links. To the right of the icon, the text "test" is entered in a dark gray font. A vertical cursor line is positioned at the end of the text, indicating the current position for typing.

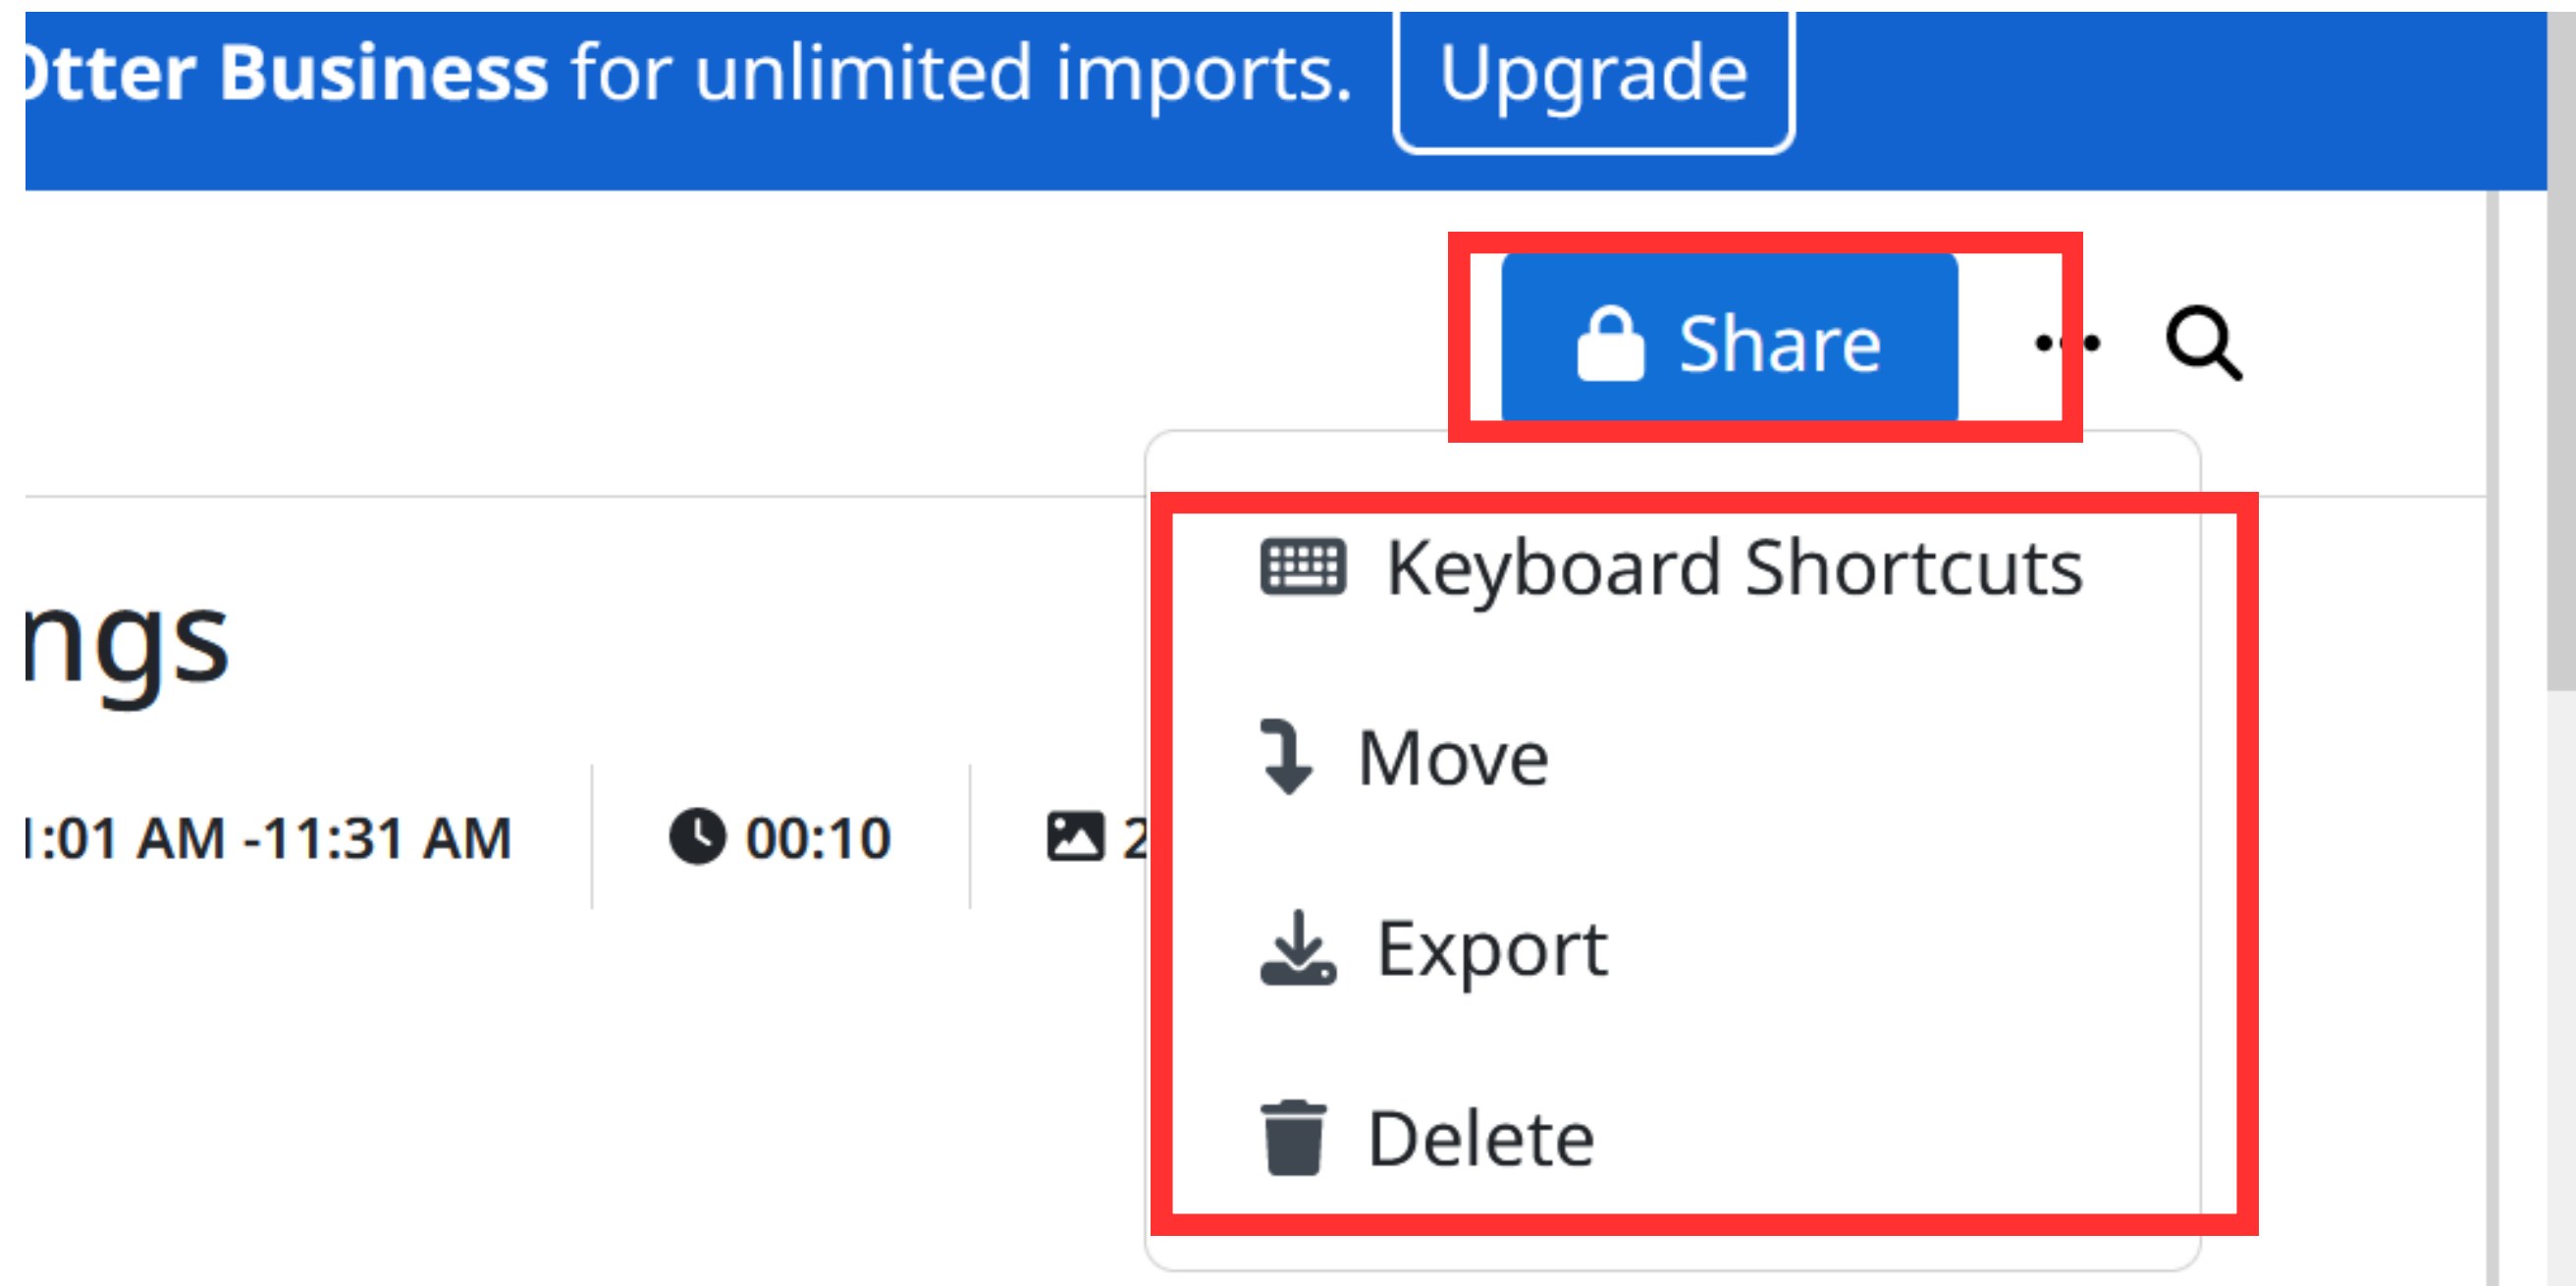

2) Use same icons as in original site of highlight, comment share and so on

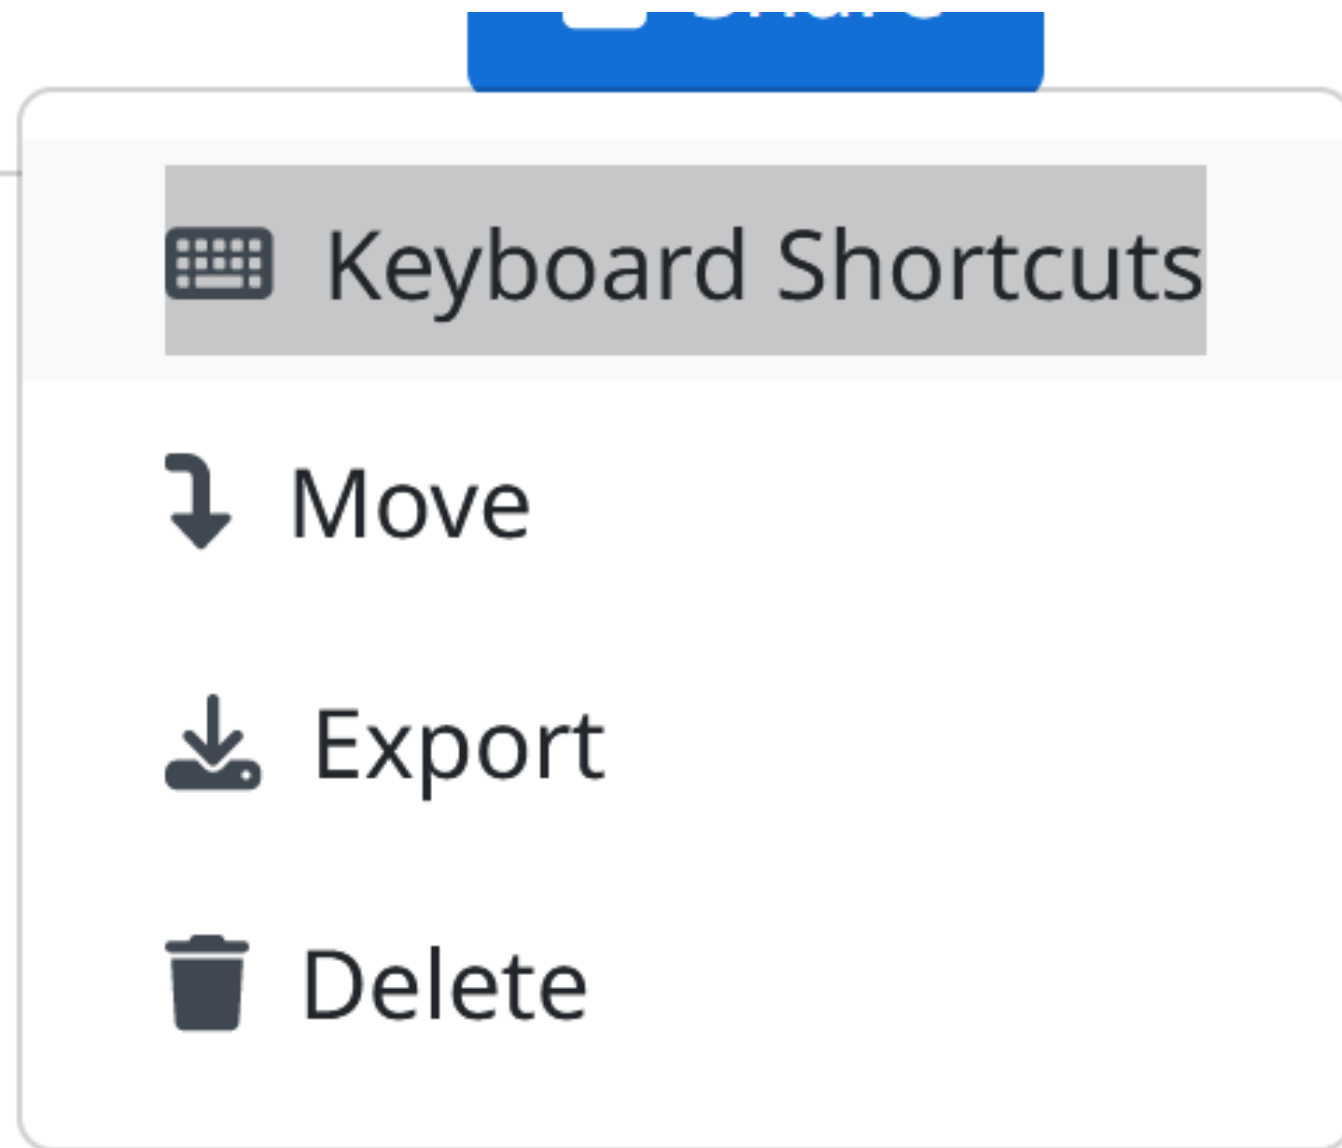

- These icons are missing in our right navbar
- When clicked on each icon, just an empty white screen is there in right navbar, so please do make

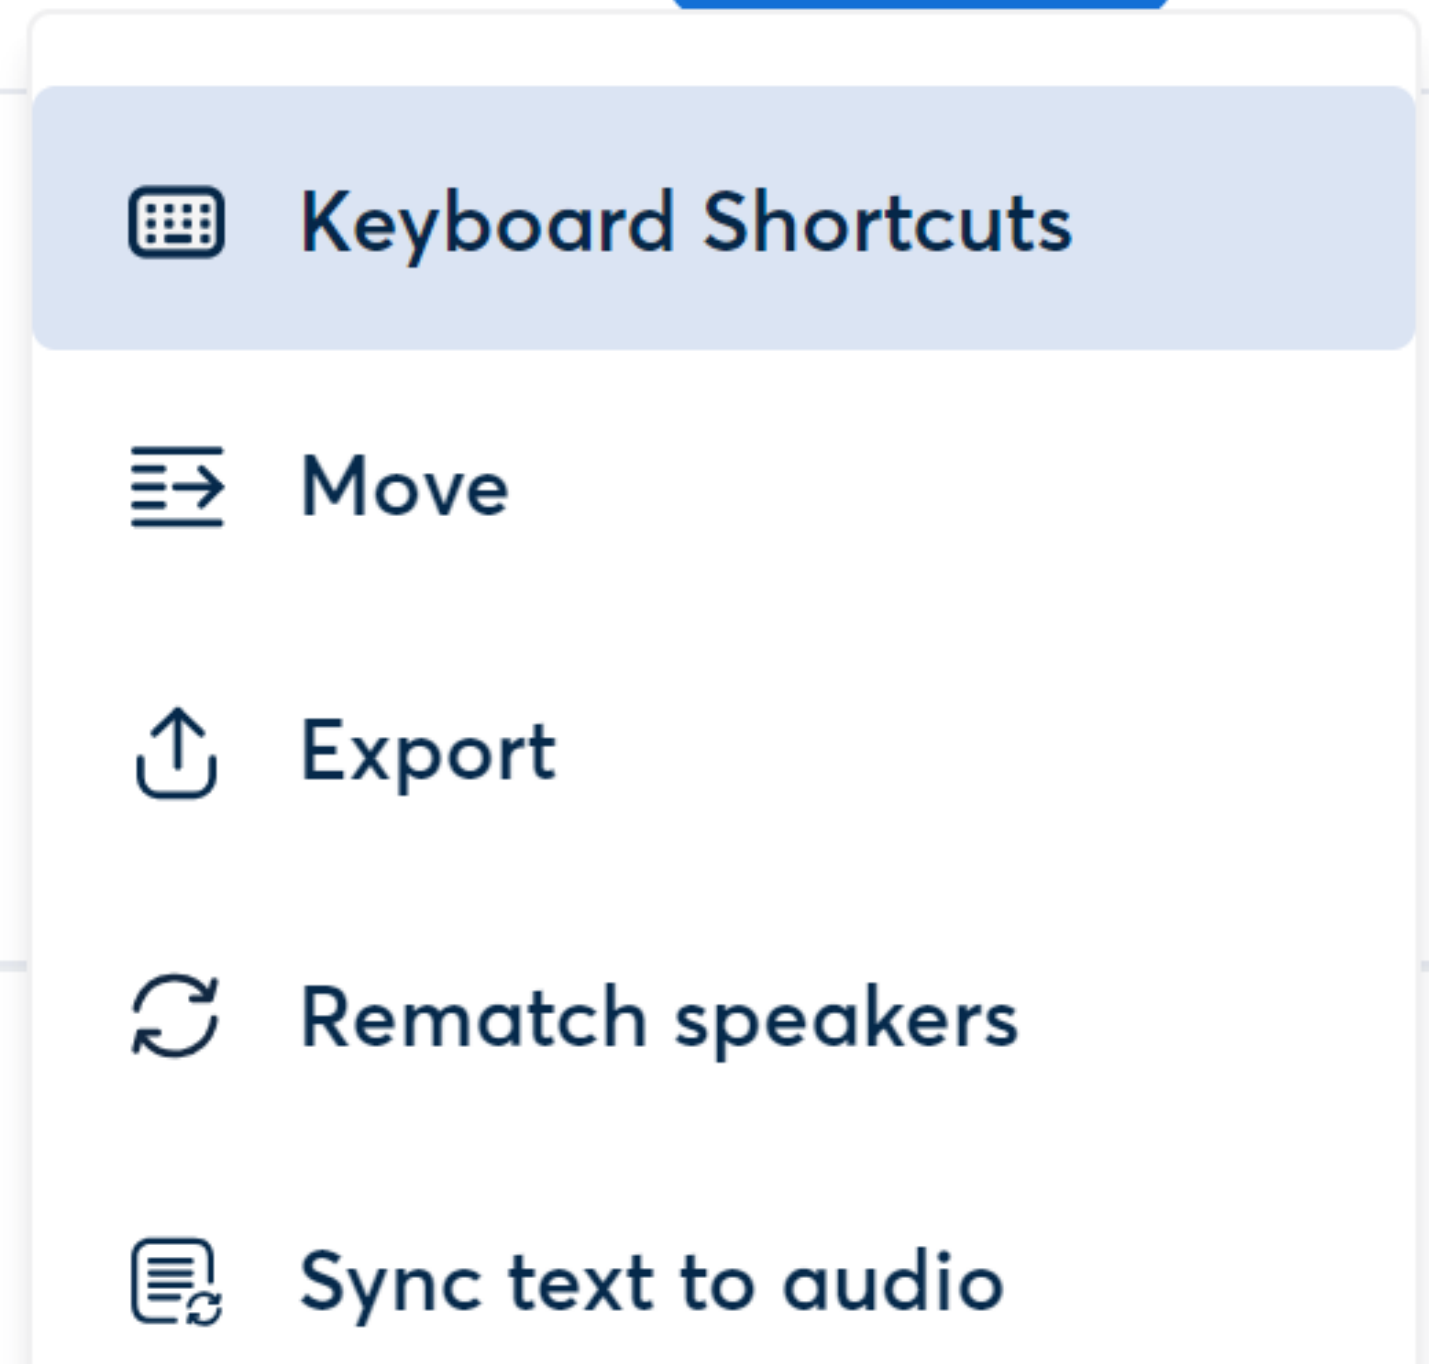

- Design a notification pop-up as well that pops-up on the top-right corner when shared, deleted, basically on any action.

When hoverr on each, the blue background which shows up should take the full width + adjust color too

Khan

- Put a play button next to timestamps which are shown when hovering on a block. (important point)
- Use same icons as in original

Netflix

In My conversations page, the look of an item should be exactly the same, including the ellipsis at the end. Also the items in the ellipsis should be present with the relevant popups for each item in it. For example the popup for share, export, move and delete. (Also make the whole page more like a list view. It looks too wide and just 1 file occupies too much space in my conversations page)
